LOVELAND RESERVOIR is owned and operated by Sweetwater Authority, a public water agency. The reservoir stores drinking water for more than 175,000 residents of Chula Vista, National City and Bonita, California.

TO PROTECT AND PRESERVE water quality and the natural habitat, Sweetwater Authority and the USDA Forest Service established a partnership in 1997 to provide public fishing access along a five-mile portion of the shoreline. In exchange for a parcel of land near the reservoir, previously owned by the U.S. Government, Sweetwater Authority provided land near Descanso, California to the National Forest System. This exchange increased natural habitat and forest lands available to San Diego County and Southern California residents and wildlife.

FISHING ACTIVITIES at Loveland Reservoir are designed to protect public health and benefit the community. Activities will be monitored by Sweetwater Authority. Please stay in designated areas. Fishing access is limited to posted areas between sunrise and sunset only. All County, State and Federal regulations will be enforced. Discharge of human waste in or around the reservoir is a violation of state law.

PLEASE RESPECT THE SENSITIVE ENVIRONMENT PRESENT AT THE RESERVOIR.
